

NOZZLES AND STREAMS

Chapter 16

Define fire stream	619
Identify the purposes of a fire stream.....	466
Identify the various uses of water as an extinguishing agent	188
Identify the types of fire stream nozzles	517-518
Identify the water flow / GPM of handlines and master streams.....	472
Identify the safe operation of fire stream nozzles	618-620
Define nozzle reaction	N/A
Define Water Hammer and techniques for its prevention	466
Identify observable results that are obtained when the proper application of a fire stream is accomplished.....	617-628
Identify methods of water application.....	620-621
Identify the use of various nozzles carried on fire apparatus	516-517
Identify the procedures for cleaning, maintaining, and inspecting nozzles.....	520
Identify the principals of both Class A and Class B foam as an extinguishing agent.....	521
Identify the methods by which foam prevents or controls a hazard	521
Identify the necessary equipment for the application of Class A and Class B foam	522
Identify the principle by which foam is generated.....	521
Identify the techniques of applying Class B foam	523-524
Identify common causes for poor foam generation and how to correct it	344-345
Identify the procedures for inspecting, cleaning, and maintaining foam appliances.....	520
